ISAIAS WRAP-UP

Landfall near Destin 8:30 PM CT Fri · 105 mph Cat 2 · post-tropical, 35 mph (NHC final Adv 15)

haildatahub.com · Full report · NOAA NHC / NWS / WPC

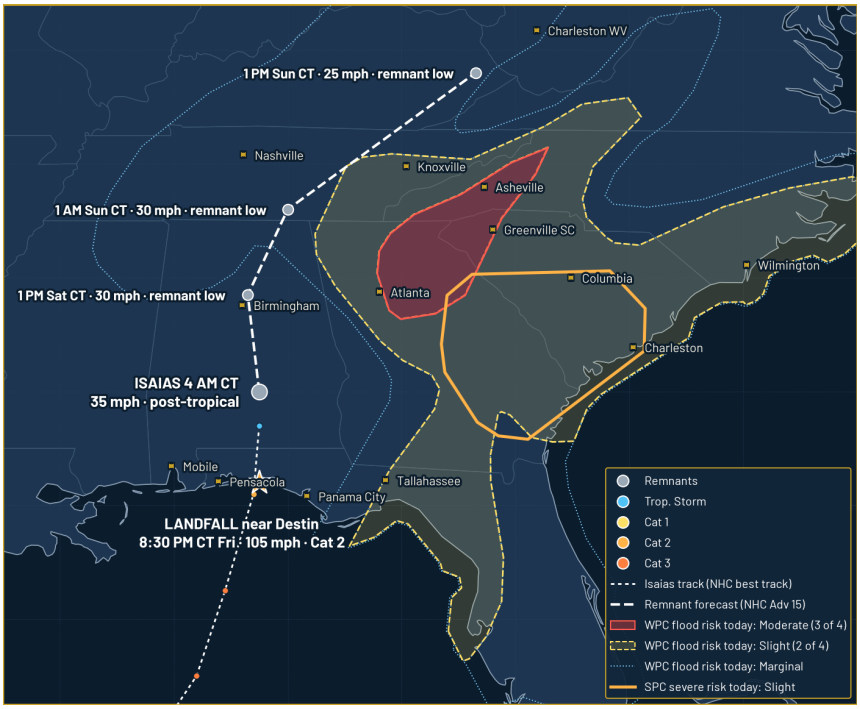

The danger now is flooding rain. WPC has a **Moderate Risk (3 of 4)** of flash flooding today over the Southern Appalachians, from northeast Georgia into Upstate South Carolina and western North Carolina, with maximum totals of 6 to 10 inches across far western North Carolina into the Upstate of South Carolina (WPC). SPC has a **Slight Risk** of severe storms, mainly brief tornadoes, from eastern Georgia into western and southern South Carolina. Out West, **Hurricane Simon** is a 150 mph Category 4 with a Hurricane Warning for the west-central coast of Mexico. NHC expects **Tropical Storm Rachel** to approach and move ashore near the U.S./Mexico border tonight, and WPC has a Moderate flood risk Sunday from Southern California into southern Nevada, far northwest Arizona and far southwest Utah.

Impacts today (NHC, WPC, SPC, NWS)

- **Rain:** NHC: 4 to 8 in., locally 15, across southern Alabama, the Florida Panhandle and Big Bend, and southwest Georgia through the weekend; 2 to 5 in., locally 10, across much of the rest of the Southeast incl. the Southern Appalachians and coastal Carolinas. **WPC Moderate Risk today** for the Southern Appalachians (NE Georgia, Upstate SC, western NC), with 6 to 10 in. possible in the upslope areas and landslides possible. WPC also notes training storms over northwest Florida (2 to 3 in., isolated 5 in.) and very heavy totals possible along the upper South Carolina and lower North Carolina coast.
- **Tornadoes:** SPC Slight Risk from eastern Georgia into western and southern South Carolina; brief tornadoes and damaging gusts, greatest along the GA/SC border between 4 and 7 PM CT (SPC).
- **Alerts (NWS, ~8:14 AM CT):** 27 Flood Watches, 24 Flood Warnings and 3 Flash Flood Warnings nationwide, many tied to Isaias in AL, FL, GA, SC, NC and TN.
- **Surge and surf:** water levels keep falling along the Florida Gulf Coast today; life-threatening surf and rip currents continue along the Gulf coast this weekend.
- **Power:** expect long-duration outages in the Florida Panhandle and southern Alabama (NHC). Check your utility for restoration times.

2 · Mexico and the West: Hurricane Simon (Cat 4) · Tropical Storm Rachel

Item	Official (NHC, 6 AM CST (Mexico) / 7 AM CT Sat Oct 10 · Adv 12A)
Simon now	**150 mph, Category 4** · 938 mb · 17.3°N 104.8°W, about 120 mi SSW of Manzanillo and 220 mi SSE of Cabo Corrientes, Mexico · moving N at 5 mph
Forecast	Additional strengthening today; NHC Adv 12 forecast peak **155 mph** (1 PM CT Sat to 1 AM CT Sun). Near or just inland of the west-central coast of Mexico early Sunday. NHC forecast track moves it inland over Colima and Jalisco, but it could remain just offshore
Hurricane Warning	**Punta San Telmo to El Roblito** and Las Islas Marías (upgraded from a Hurricane Watch north of Punta Mita)
Tropical Storm Watch	East of Punta San Telmo to Lázaro Cárdenas
Hazards	Rain **10 to 20 in., locally 30**, in Michoacán, Colima, Jalisco and Nayarit (life-threatening flooding, mudslides) · dangerous surge near and east of landfall · rough surf

Item	Official (NHC, 5 AM PDT / 7 AM CT Sat Oct 10 · Adv 53A)
Rachel now	**60 mph tropical storm** · 992 mb · 24.6°N 120.5°W, about 595 mi SSW of San Diego, CA and 470 mi SW of Punta Baja, Mexico · moving ENE at 21 mph
Forecast	NHC: approaches and moves ashore **near the U.S./Mexico border tonight**; rapid weakening inland Sunday; dissipated by Monday
Warnings / watches	**TS Warning:** west coast of Baja California from San José de Las Palomas to the U.S. border; east coast of Baja from Isla San Luis to Puerto Peñasco · **TS Watch:** Southern California coast from the border to the San Diego/Orange County line; Bahía de Los Ángeles to Isla San Luis; Puerto Libertad to Puerto Peñasco
Rain + flooding	1 to 3 in., locally 5, in parts of the Southwest U.S. this weekend · **WPC Moderate Risk** today (portions of Southern California) and **Sunday** (Southern California into southern Nevada incl. the Las Vegas region, far northwest Arizona and far southwest Utah)
Coast + wind	NHC: moderate to major coastal flooding is expected in Southern California and northern Baja California tonight into Sunday morning; strong gusts across the interior Southwest; SPC: a few severe gusts, low tornado chance, Lower Colorado River Valley into south-central Arizona

3 · Temperature Extremes

Extreme	Value	Place / station	Day · status
World high	43.8°C (111°F)	Dammam (King Fahd Intl), Saudi Arabia	Oct 9 UTC (obs 7 AM CT) · preliminary
U.S. high	110°F	16 mi SW of Tecopa, CA	Fri Oct 9 · NOAA/WPC National High and Low, official
U.S. low	21°F	Peter Sinks, UT	Fri Oct 9 · NOAA/WPC National High and Low, official
World low	-65.7°C (-86°F)	Dome A, Antarctica	Oct 9 UTC (obs 7 PM CT Oct 8) · preliminary

World values are preliminary station reports for the 24 hours ending 7 PM CT Friday (00 UTC Oct 10) and may change. U.S. values (contiguous United States) are from the NOAA/WPC National High and Low issued 9:30 PM CT Friday.

Top Weather Stories (official sources)

1) Isaias lands near Destin as a Category 2 with 105 mph winds Friday night, then weakens fast over Alabama (NHC).

2) Flood threat shifts to the Southern Appalachians: WPC Moderate Risk today, 6 to 10 in. possible in upslope areas, landslides possible (WPC, NHC).

3) Simon rapidly strengthens to 150 mph, a Category 4, with a Hurricane Warning from Punta San Telmo to El Roblito (NHC).

4) Rachel expected to move ashore near the U.S./Mexico border tonight (NHC); NWS San Diego Flood Watch for San Diego County and the Riverside and San Bernardino county mountains and deserts, 1 AM CT Sunday to 10 PM CT Sunday; WPC Moderate flood risk Sunday in the Southwest.

5) Early-season winter weather in Montana: Winter Storm Warnings in the Montana mountains (NWS).

4 · What to do

- **Florida Panhandle and southern Alabama (post-storm):** stay off roads with debris and downed lines; treat every downed line as live. Follow local officials before returning to evacuated areas
- **Generators:** outdoors only, at least 20 feet from doors, windows and garages (NHC)
- **Document damage:** photograph your home, roof, vehicles and belongings before cleanup (wide and close), keep receipts, make only temporary repairs to stop further damage, then call your insurer. Flood damage usually needs flood insurance, not a standard homeowners policy
- **Southern Appalachians, Georgia and the Carolinas (today):** flash flooding and brief tornadoes possible. Have two ways to get warnings; never drive into water over the road; watch for landslides on steep slopes
- **San Diego area and the desert Southwest (tonight into Sunday, NWS Flood Watches):** secure outdoor items, stay out of washes, slot canyons and burn scars when rain hits, and avoid flooded coastal roads at high tide
- **West-central Mexico (Simon):** follow the guidance of Mexico civil protection authorities; travelers to Manzanillo and Puerto Vallarta should check with airlines and hotels
- **Beaches (Gulf Coast, Southern California, NHC):** life-threatening rip currents and surf; stay out of the water
